BHAVESH SABNANI

Chandigarh,India | 9664320613 | bhavesh.sabnani2005@gmail.com | linkedin.com/in/bhavesh-sabnani-256946372 | github.com/BhaveshSab | bhaveshsabnani.tech

Full-stack developer (B.Tech, PEC) building ERP-style backends and React front ends. Built VendorBridge, a procurement ERP with race-safe approval workflows, role-based access, and an append-only audit trail, during a Kagnus internship. Built AssetFlow, a NestJS/PostgreSQL asset-management ERP with 60+ REST endpoints and concurrency-safe transactions. 250+ LeetCode problems solved.

EDUCATION

Punjab Engineering College (PEC), Chandigarh | *B.Tech, Electrical Engineering | GPA: 7.69/10 | Aug 2024 - May 2028*
JEE Mains: *98.04 percentile (out of 1.6M+ candidates)*
XII, RBSE Board, *Jaipur | 87% (90% PCM & English) | 2022 - 2023*
X, RBSE Board, *Jaipur | 92% | 2020 - 2021*

WORK EXPERIENCE

Full Stack Developer Intern — Kagnus Engineering Network | *Remote Internship Program | Oct 2026 – NOV 2026*
Repo: github.com/BhaveshSab/VendorBridge-kagnus | **Live:** vendor-bridge-kagnus.vercel.app
VendorBridge ERP *(Node.js, Express, PostgreSQL, Prisma, Redis, React, Typescript, Vercel)*

- ***System Architecture:*** *Built a full-cycle procurement ERP (RFQ to quotation comparison, approvals, purchase orders, invoices, reports): 40+ REST endpoints across an 18-table PostgreSQL schema (Prisma) with 4 role-based access tiers, deployed on Vercel + Neon.*
- ***Concurrency & DB Integrity:*** *Made approval-to-invoice race-safe with row locks, conditional updates and unique indexes (one decision, one document); database triggers keep the audit log append-only and reject late bids; versioned quotation snapshots block stale approvals.*
- ***Performance & Analytics:*** *Added a fail-open Redis (Upstash) cache and rate limiter with PostgreSQL fallback; built currency-safe spend analytics and CSV exports with formula-injection protection; server-rendered PDF invoices with tracked email delivery.*
- ***Security & Testing:*** *Enforced server-side RBAC with 404 anti-probing and httpOnly-cookie JWT sessions; computed all money server-side on DECIMAL values, with zero rounding drift verified across 10,000+ generated purchase orders; 400+ automated checks (227 API, 182 browser E2E).*

PROJECTS

AssetFlow — Asset & Resource Management ERP | *NestJS, TypeScript, PostgreSQL, Prisma, JWT, React*
Repo: github.com/BhaveshSab/assetflow | **Live:** odoohackathon-ujkn.vercel.app

- *Built the NestJS backend of a full-stack asset ERP: 10 modules and 60+ REST endpoints with JWT role-based access across 4 roles, department- and row-level scoping, deployed serverless on Vercel.*
- *Made allocation and booking conflict-safe under simultaneous requests (one allocation per asset, overlap-proof time slots, asset tags minted inside a transaction) and modeled transfer, maintenance and audit workflows as state machines that reject invalid transitions with 409.*
- *Hardened auth (bcrypt + SHA-512 pre-hash, no user enumeration, per-account/IP brute-force throttling, DTO whitelisting); verified with 174 automated checks: 45 unit, 105 e2e on embedded PostgreSQL (PGlite), 24 frontend.*

OpenClaw Autonomous AI Agent Platform | *TypeScript, Node.js, LLM Integration, Webhooks, Docker*
Repo: github.com/BhaveshSab/OpenClaw

- Deployed the open-source OpenClaw agent as a self-hosted AI assistant with multi-model LLM support, using natural-language tool-calling to automate digital workflows.
- Configured Telegram and WhatsApp channels to trigger tasks remotely; containerized the deployment in Docker to isolate script execution and protect API keys.

TECHNICAL SKILLS

- **Languages:** C++, TypeScript, JavaScript, Python
- **Generative AI & Agentic Systems:** RAG (Retrieval-Augmented Generation), MCP (Model Context Protocol), Agentic Orchestration, Multi-Agent Systems, LLM APIs (OpenAI, Gemini), n8n
- **Backend & Databases:** Node.js, Express.js, PostgreSQL, Prisma ORM, MongoDB, Vector Databases, Redis, WebSockets, REST APIs
- **Frontend Development:** React.js, Next.js, Tailwind CSS, Redux Toolkit, Framer Motion, shadcn/ui
- **Cloud & DevOps:** AWS (EC2, SES), Docker, Vercel, Render, Git/GitHub
- **Core Engineering:** Data Structures & Algorithms (250+ Problems), Object-Oriented Programming, DBMS, Operating System, TCP/IP networking fundamentals

ACHIEVEMENTS & CERTIFICATIONS

- **Kagnus Engineering Network -** Full Stack Developer Internship Program, Certificate of Completion | Nov 2026 | ID: KGN-CERT-26-FS-G38541 | talent.kagnus.com/verify
- **Redis Associate Developer — Redis | Scored 92% | Aug 2026**
- **Oracle Agentic AI Certified** Foundations Associate — Oracle, Jul 2026
- **Programming in Modern C++ (Elite Certificate)** | NPTEL / IIT Kharagpur | Elite, top 5% of 26,183 candidates | 2025
